

Ref: Egypt Bread Civilisation

Date: 13 August 2021

Dear Mr. Vujadinovic,

It is with great interest that IGCAT receives information about your planned activities regarding the Egypt Bread Civilisation. IGCAT advocates to protect and promote the diversity of food cultures around the globe and therefore your research is of utmost interest to us, as a global network.

Often forgotten or neglected food legacies have a much deeper connection than one imagines to environmental sustainability. Lost recipes unfortunately has gone hand in hand with lost plant and animal varieties, exasperating an already critical climate change crisis.

We would therefore appreciate that you keep us informed regarding results of your projects in this regard and from IGCAT we will be pleased to share and distribute information to our nearly 10,000 subscribers world-wide.

With warmest wishes,

Dr. Diane Dodd
President, IGCAT
